

# Positioning and Comfort Products for Wheelchairs

Discover our complete range of ergonomic solutions designed to improve daily comfort and postural support for wheelchair users. RENOL positions itself as your preferred partner for everyday well-being and comfort, with products that combine technical innovation, modularity, and ease of maintenance.

## Complete Positioning Kit RCF56000

The RCF56000 complete positioning kit is our integrated solution to ensure optimal postural support while providing enveloping comfort for manual wheelchair users.

Developed in collaboration with occupational therapists, this modular system meets the demands of healthcare professionals.

### Detailed Composition

- Comfort seat cushion (ref. RCF44045)
- Enveloping lateral armrests (ref. RCF50025)
- Ergonomic multi-lobed backrest (ref. RCF55040)

## Key strengths of the RENOL

### Exceptional Comfort and Safety

Advanced technical materials such as silicon fiber and an innovative dual-sided cover: polyurethane waterproof on one side and cotton on the other.

### Optimal Hygiene

Waterproof and fully washable covers make daily maintenance easy and ensure increased durability, even under intensive use.

### Modularity and adaptability

Individually adjustable components to precisely fit different body shapes and meet specific needs related to various pathologies.

## Therapeutic Benefits

### A Reassuring Enveloping Sensation

The lateral cushions and multi-lobed backrest create a cocoon-like feeling, particularly beneficial for patients suffering from anxiety or proprioceptive disorders. This sensation helps reduce restlessness and enhances the feeling of security.

### Less Pain, More Peace of Mind

The ergonomic design promotes a natural posture that significantly reduces muscle tension and effectively relieves pressure points. This reduction in biomechanical strain translates into a notable decrease in chronic pain.

## RENOL Wheelchair Positioning and Comfort Products

### Complete Positioning Kit RCF57000

The RCF57000 complete positioning kit is our integrated solution to ensure optimal postural support while providing exceptional, enveloping comfort for manual wheelchair users. The cushion with an abduction pommel helps prevent forward sliding and enhances user safety.

Developed in collaboration with occupational therapists, this modular system meets the high standards of healthcare professionals.

#### Detailed Composition

- Tilted Seat Cushion with Abduction Pommel (**Ref. RCV07300**)
- Enveloping Lateral Armrests (**Ref. RCF0025**)
- Ergonomic Multi-Lobed Backrest (**Ref. RCF55040**)

### Key Advantages of the RENOL Range

#### Exceptional Comfort and Safety

- High-performance technical materials
- Front: Innovative waterproof polyurethane cover
- Back: Soft, breathable cotton fabric

#### Optimal Hygiene

- Waterproof, fully washable covers
- Easy daily maintenance
- Long-lasting durability, even with intensive use

#### Modularity and Adaptability

- Individually adjustable elements
- Precise adaptation to various body types
- Customizable to meet specific pathological needs

### Therapeutic Benefits

#### Reassuring Envelopment and Secure Support

- Abduction pommel provides a sense of security and prevents forward sliding.
- Lateral cushions and multi-lobed backrest create a cocoon-like feeling, ideal for patients with anxiety or proprioceptive disorders.
- Contributes to reducing restlessness and improving the feeling of safety.

#### Less Pain, More Serenity, Enhanced Safety

- Ergonomic design promotes a natural posture.
- Significant reduction of muscle tension and pressure points.
- Decrease in chronic pain.
- Improved stability and safety through better seating alignment.
